Art Unit: 1761

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 8, 2007 has been entered.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 and 5-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cole et al (4,452,824) taken with or without Cole et al (4,374,154). Cole et al ('824) is described on pages 2-3 of the July 12, 2005 Office action. Applicant is also referred to the reasoning set forth in paragraph no. 3, Paper No. 080306.

4. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cole et al ('824) in view of Cole et al ('154) as set forth on pages 4-5 of the July 12, 2005 Office action.

5. Claims 13-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cole et al ('824) taken with or without Cole et al ('154) as applied to claims 1-3 and 5-12 above, and further in view of De Vries et al (3,752,364) as set forth on pages 5-6 of said Office action.

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1-17 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 4 of copending Application No. 10/323,303. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the reasoning set forth on page 7 of said Office action.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

8. Applicant's arguments filed March 8, 2007 have been fully considered but they are not persuasive. Although the Wix declaration attempts to show why Cole et al ('824)

Art Unit: 1761

does not teach applicant's invention, as applicant contends in the remarks, said declaration does not discuss the primary reference applied herein, viz. (4,374,154). Rather, applicant argues that Cole et al ('154) suffers from loss due to overrun upon extrusion. However, this overrun can be less than 100% if a more dense product is desired (col. 4, lines 59-60), which overrun % is within applicant's claimed range for overrun. Applicant also does not understand why Cole et al ('824) would look to Cole et al ('154) for an extrudable soft ice cream. Since both patents are concerned with preparing readily extruded soft ice cream products they are analogous and properly combinable for the reasoning set forth in paragraph no. 3, Paper 080306. The law of obviousness does not require that references be combined for the reasons contemplated by the inventor, but only looks to whether some motivation or suggestion to combine references is provided by the prior art taken as a whole (In re Beattie, 24 USPQ2d 1040).

9. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1761

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
